

BRISTOL'S CONNECTED COMMUNITY

MAKING A PROGRAMMABLE CITY WORK FOR ITS CITIZENS

When car sharing, the driver has the ability to either use bus lanes or have a guaranteed parking space which in a busy city will be a strong persuader to car share.

App location recognition sends important notifications specific to your location such as traffic changes, people car sharing and bus/train times.

The Bristol pound allows citizens and local businesses to utilise a currency that stays within the community which in turn helps small local businesses.
